AGENTS FOR THE UNIVERSAL SAW GIN,

Cleaner and Condenser. HAND GINS FROM 18 TO 25 SAWS.

POWER GINS FROM 20 TO 100 SAWS.

THE HAND GINS WILL TURN OUT FROM 500 TO 700 POUNDS PER DAY WITH TWO HANDS.

THE CLEANER AND CONDENSER ATTACHMENT is an ENTIRELY NEW FEATURE, and a great acquisition to the Glu proper. It is very simple in construction and operation, and requires no appreciable force to drive it. It serves to separate all the vast amount of fine dust and sand from the ginned cotton, which, by the ordinary process, would be deposited with it, and be packed in bales for market. The Condenser also prevents the possibility of firing the ginning buildings, even if the Gin itself could generate fire (which this Gin cannot do). It occupies but little space, and may be operated in almost any building, however small, and when desirable may be used in the open field. It is entirely portable, and, with the Gin, forms A COMPLETS GINNING ESTABLISHMENT OF HISELF, which can be moved from plantation to plantation.

The saving in the erection of buildings such as are required for these Gins and Condensers over the cost of those required for other gins, will far exceed the entire outlay for these improved Universal Cotton Gins and Condensers complete for use.
